

Data Analysis: Average Number of Ratings per Joke & Average Number of Ratings per User

There isn't a fantastic way to present this information in an aesthetic way, since it's just two numbers. The data used was the 'ratings.csv' file found on GitHub, and the .py file was uploaded as well to demonstrate how these numbers were calculated

Average Number of Ratings per Joke	91.88
Average Number of Ratings per User	160.95
